Dear Hiring Manager,

I am writing to express my interest in the opportunity at your organization. I am a Senior Software Engineer and Technical Lead with **over 11 years of experience** designing, developing, and delivering high-quality full-stack software solutions across domains including **blockchain, ERP, HR, and healthcare**. I hold an MSc in Information Technology from Cardiff Metropolitan University and a BEng (Hons) in Software Engineering from Staffordshire University, providing a strong foundation in software architecture and engineering best practices.

Currently, I work at **SoftBuilders Software Design LLC** as a **Software Developer (Team Lead – Backend)**, where I am hands-on in development while leading backend engineering for a large-scale, distributed application. My responsibilities include designing scalable microservices, real-time systems, batch processing workflows, APIs, and ensuring performance, reliability, and secure cloud deployments..

Throughout my career, I have combined hands-on full-stack development with technical leadership, building scalable backend systems, microservices, real-time applications, and responsive front-end interfaces. I have extensive experience with technologies such as Node.js, NestJS, Express.js, React, Next.js, TypeScript, JavaScript, PHP, Redis, RabbitMQ, BullMQ, and cloud platforms including Azure, AWS, and Google Cloud. I apply best practices in software design, code optimization, testing, and agile delivery to ensure high performance, maintainability, and scalability across both backend and frontend systems.

I have led teams of engineers, conducted code reviews, and mentored developers while actively contributing to coding, architecture design, and system optimization. I thrive in challenging environments where I can leverage both my full-stack technical expertise and leadership skills to deliver robust, efficient, and innovative software solutions. I am confident that my experience, technical proficiency, and commitment to excellence can contribute effectively to any organization seeking a dedicated full-stack software engineering professional.

I would welcome the opportunity to discuss how my skills and experience align with your organization's goals and contribute to delivering impactful software solutions. Thank you for considering my application, and I look forward to the possibility of joining your team.

Sincerely,

Chathuranga Kumarasinghe
